E-PoC for Android & iOS

Professional Smartphone / Tablet E-PoC Application

As part of Entel's E-PoC Push-to-Talk over Cellular (PoC / Wi-Fi) Solution, our E-PoC Smartphone App combined with E-PoC Dispatcher and DN400 series E-PoC radios, enables you to communicate with, locate, manage and ensure the safety of your mobile workforce.

Practically Unlimited Range

Using Entel's E-PoC App enables your Smartphone make instantaneous PTT calls over Cellular & Wi-Fi networks to other E-PoC Smartphones, DN400 Series radios and E-PoC Dispatchers.

No Limitations

Entel's E-PoC App enables your workforce to make a practically unlimited number of simultaneous Push-To-Talk Group or Individual calls.

No License, No Interference!

There's no need for a radio license and best of all you won't suffer channel interference from other radio users.

Scalable

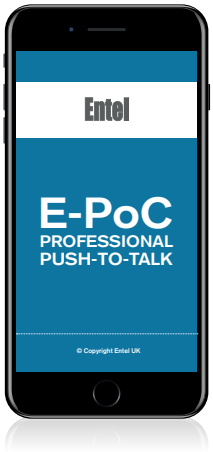
Entel's simple and flexible pricing options can be adapted to your business needs. There are no heavy up-front infrastructure or ongoing site / line rental, IP link or license costs to worry about.

Presence Check

With the E-PoC App your Smartphone will indicate which users are online.

Cross Platform Communications

Entel's E-PoC Smartphone App forms part of a solution that can unify your mobile communications. Other products in the range include a PC Dispatcher App, DN400 radios and Radio Gateway (allowing connection with existing radio systems), everyone can talk together at the press of a button.



Lowest Call Latency

Entel's radios, apps, servers and SIMs have all been optimised to deliver call latency times equivalent to DMR.

Emergency Features*

Entel's E-PoC Smartphone App support an emergency button, Lone-Worker and Man-Down features with automatic transmission of the users precise location.

Always On

Entel's E-PoC App runs in the background providing instant Individual and Group PTT voice communications as well as messaging that are confined to your organisation.
