

Firefighting Safety Helmet

SCA 1205P

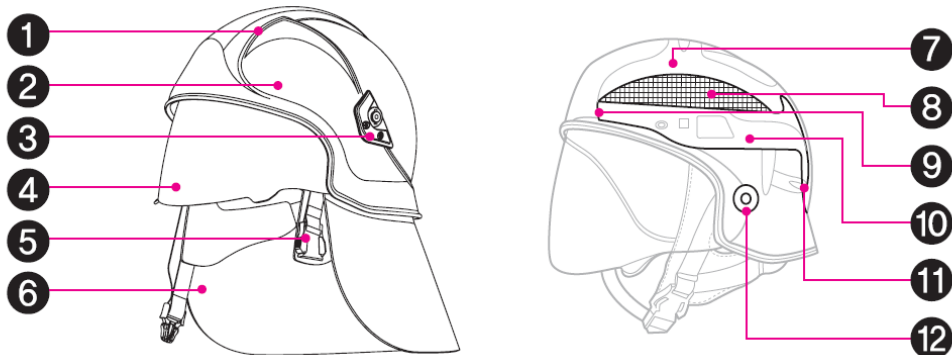

Color ● ● ● ●

FEATURES

- The helmet is designed for firefighting operations and provides protection against impact, penetration, heat, and flame.
- The helmet shell is made of PEI (Polyetherimide) material, which is known for its high strength, toughness, and excellent resistance to impact, heat, and flame.
- The inner aramid mesh is designed to provide additional impact resistance and absorption to enhance the protective capabilities of the helmet.
- The user can adjust the helmet size to fit the head circumference. Size adjustable knob on the rear part is big enough to access even with gloved hands.
- The neck protector is made of a heat-resistant and flame-retardant material that provides complete coverage of the neck and ears for enhanced protection.
- The visor is designed to provide excellent resistance against flames, abrasions, impacts, and radiant heat. It also offers a field of view of over 90°C.
