1000S FRONT AIRCREW IMMERSION SUIT

Comfort and safety for helicopter pilots

Precision engineered to work with you. The ergonomic design and modular pockets allow easy movement and performance of tasks, unhindered and in comfort. The suit's shell is breathable and flame retardant, while the lightweight liner provides thermal protection against the elements.

BENEFITS:

- ✓ Internal braces and the U-don zip means you can wear the suit fully open between flights
- ✓ GORE-TEX Nomex outer shell combines breathability with fire protection
- ✓ Ergonomic design tested on all major aircraft types to enhance flying performance through superior temperature control and comfort
- ✓ Pockets can be adjusted to suit aircraft, mission or pilot preference
- ✓ Air release valves enable quick suit venting and increased safety in the water
- ✓ Lightweight thermal liner provides thermal protection to the etso standard
- ✓ Rent or buy. Rental options available to ensure crew keep flying while suits are serviced
